Streamline™ E-commerce Redesign – NEW

Enhancement

Favorites

Favorites are available for logged in users only. Favorites functionality is available in 2 distinct areas on the website:

- The product-specific heart  icon allows you to add or remove a product from a Favorite list.
- The Favorites List maintenance, found under the heart  icon in the header section, allows you to create, edit or delete lists.

Product-Specific Favorites:

A heart icon  denotes whether a product is on a Favorites list. Specifically:

- When the heart is filled, the product is on one or more Favorites lists, for the current shipping address.
- When the heart is unfilled, the product is not on any Favorites lists, for the current shipping address.

Favorites List Maintenance:

When you click on the heart  icon in the header section, the Favorites Lists page opens.

- All of the Favorite lists that exist for the current shipping address are displayed.
- You can create, edit or delete Favorites lists.

If the heart icon is unfilled, then no Favorites lists exist for the current shipping address.

Update

Streamline™ ERP – E-commerce Default Controls for Page Displays

In 2022.4, changes were made to some of the E-commerce Default Controls for Page Displays to lock the settings in order to match the fixed formats on the e-commerce web site. This has now been extended to the following e-commerce screens:

- Quote Submissions (List and Details Views)
- Order Submission (List and Details Views)
- Held Submissions (List and Details Views)
- Associated Products (Tile View)
- Shopping Cart/Checkout (Details View)

Update

Clear Search and Filters when Navigating to Home Page via Company Logo

When search parameters and/or filters are set on the e-commerce website, both are retained until you return to the home page using the company logo. At this point, all of the filters and/or search parameters are cleared.

Update

Search Function Available Only When Catalog User Defined

The search field in e-commerce is dependent upon the presence of a catalog user.

- If a catalog user is not defined in Streamline™ ERP > Web User Accounts, the search bar will not be visible on the e-commerce website until a web user has logged into their account.

Enhancement**Bilingual Version of Guest User Quote Confirmation**

Confirmation emails are generated when a guest user on the e-commerce website submits a quote. The emails are sent to the email address provided by the guest user and to the sales rep associated with the default catalog user.

- These emails are now sent bilingually (French and English) depending on the shipping Province (Quebec is bilingual) or the setting of BR WEB 26 Force Bilingual Confirmation Emails.

Enhancement**Streamline™ E-commerce Version Added to Homepage**

The e-commerce version is now available on the website in the bottom right corner of the footer section.
